

Experienced Programmer

PikPok is looking for talented Experienced Programmers to join our world beating mobile game dev team!

The ideal candidate will have experience in the Games Industry and have shipped titles working in a managed team environment. You should enjoy the fast pace of mobile game development, and the challenges that entails. You should also have knowledge of a variety of game systems, such as: graphics, gameplay, networking, AI, art pipeline, sound, and animation. You should have good communication skills and should enjoy working with other disciplines to produce quality, whilst negotiating the challenges inherent in building games.

Responsibilities:

- Work with artists and designers to create quality PikPok signature experiences.
- Work in a supportive team environment with guidance from Senior Programmers.
- Learn, and develop any game systems as required.
- Create and maintain tools for use by other members of the team.
- Work with Project Tech Leads to estimate and plan work.

Requirements:

- 3 years experience in the Games Industry or related fields.
- Fluent in C++ and/or C#.
- High aptitude for learning new skills.
- Understanding of good software design and architecture.
- Strong communication skills.
- Able to talk through problems and collaborate in system design.
- Good debugging skills and practices.
- Visual Studio and/or Xcode experience.
- Experience working with version control systems (SVN and GIT).
- Writes good readable code.
- Familiar with scrum/agile development practices.
- Knowledge of mobile game production processes.
- Experience developing multiple types of game systems.
- Must be a New Zealand resident or have a relevant Visa.

- Fluent in English.

Bonus points:

- Experience in Unity3D
- Experience working with and integrating 3rd party SDKs.
- Experience with content creation tools - Maya, 3DS Max, After Effects.
- Tell us what games you're playing!
