

PikPok - Online Games Services Developer

PikPok is a globally focussed, leading digital publisher of fun and addictive games across smart phone, tablet, and desktop. With a portfolio of original, licensed, and third party developed properties, PikPok delivers games that appeal to a broad range of consumers with addictive game play, high-quality art, and immersive audio design.

We're looking for a skilled, experienced and proactive developer to work on PikPokPlus, our online game services platform. **PikPokPlus** drives all core online functionality across our portfolio of current and future titles, with features including leaderboards, cross platform profile synchronisation, and user to user challenge mode game play.

The individual should have a strong background in developing web applications, specifically those designed to communicate with applications through a REST style API. Strong applicants will understand the importance of communication, service scalability and the realities of developing in a fast paced environment where platform stability and timeliness of feature development are critical to the ongoing success of the business.

Skills & Experience

- Design and development of an online backend servicing a diverse selection of apps with varied requirements and high user volume.
- Experience designing databases for scalability, reliability and long term ease of use.
- Use of Python for web application development, using frameworks such as Pyramid.
- Database interaction through ORM layers (such as SQL Alchemy).
- Experience with NoSQL databases in situations where their performance characteristics are desirable.
- Up to date knowledge of current web technologies for website development, with a focus on developing web based tools for use by internal teams.
- Design and implementation of client library code for client server interactions utilising REST style APIs.

- Skilled communicator:
 - Should be capable of distilling the technical requirements from various teams; finding commonality amongst them.
 - Good at communicating delivery schedules and any changes thereof.
- Ability to plan feature development, accurately accounting for all tasks which must be completed.
- Experienced in working with an Agile development methodology such as Scrum.

Technologies

- Python
 - Backend Web App Frameworks (such as Pyramid)
- SQL Databases
- NoSQL Databases
- HTML, CSS, Javascript
- Web app frontend frameworks (such as Angular JS)
- (Desirable) C++
- (Desirable) Unity3D/C#
