

Game Analytics Developer

PikPok is looking for a passionate Analytics Developer to join our world beating mobile game dev team!

We're PikPok, New Zealand's longest standing game developer, and we make great game experiences. We want to create and entertain, while being successful and enjoying what we do, and we're looking for people who want that too. Over the years, we've built loads of games for all sorts of platforms, most recently titles like *Rival Stars Horse Racing* and *Into the Dead 2* on Android and iOS. Our teams are small, and everyone involved can contribute to the decisions that shape the products.

We're looking for a skilled, proactive individual who loves games to support the ongoing analysis of PikPok's digital & mobile titles to better understand user behaviour.

The ideal candidate will have prior commercial experience in software development, cloud technologies, database management, a strong background in business intelligence, preferably in the gaming sector. They will possess an understanding of gaming and associated business models including free-to-play.

We welcome applications from diverse candidates and those with a range of backgrounds, skills, and experiences.

Skills

- Excellent development skills in Python and SQL
- Background in database management and business intelligence
- Experience with big data handling and processing
- Knowledge of cloud technologies
- Intuitive understanding of good software design and architecture
- Excellent debugging skills and practices
- Experience working with version control systems (SVN and GIT)
- Familiar with scrum/agile development practices
- Strong verbal communication skills
- Keen knowledge and interest in games especially mobile and free-to-play

Responsibilities

- Working within a motivated team - communicating effectively within that team as well as outwardly.

- Extract and analyze user data from multiple sources including server logs, 3rd party SDK's/tools, A/B tests etc.
- Create and maintain back end data pipeline and databases
- Develop internal front end software tools for analytics development and automation

Qualifications

- Tertiary level programming and/or information technology focussed degree

Bonus Points For:

- Experience using
 - Amazon Web Services
 - Postgres
 - JavaScript
 - Typescript
 - C#
 - Celery
 - Markdown
- Knowledge of digital user acquisition
